Dr. Who: Series 2 on DVD

Following Doctor Who's triumphant return to BBC ONE last year, the second series proved just as popular, consistently topping ratings charts and gaining enormous critical acclaim. The series introduced the sparkling David Tennant as the tenth Doctor, with Billie Piper returning as his companion Rose, Noel Clarke as Rose's boyfriend Mickey and Camille Coduri as Rose's mum Jackie.

Now fans can own the entire series together on DVD for the first time in this highly collectable lenticular packaging that features a special moving image on both front and back, and with over 4 hours of extras.

Over the second series, the Doctor and Rose continued to have spectacular adventures that were out of this world, battling sinister Sycorax, crazy catwomen, a wicked werewolf, killer Krillitanes, a deadly demon and of course the Doctor's two ultimate enemies – the Cybermen and Daleks, who did battle together for the first time ever!

Boasting state of the art visual effects, the second series also featured a host of special guest stars including Anthony Head, Elisabeth Sladen, Marc Warren, Shaun Dingwall, Maureen Lipman, Pauline Collins, Penelope Wilton, Peter Kay, Roger Lloyd Pack, Shirley Henderson, Sophia Myles, Tracy Ann Oberman and Will Thorp.

Dr. Who: Series 2 is available to buy on Monday, November 20.
