Sci-Quest offers chance to learn about human body

Sci-Quest, the North Alabama Science Center, Inc., will open "Bones: An Exhibit Inside You," an interactive traveling exhibit, and "Inside The Human Body," a new 3D Immersive Theater presentation Oct 1. The exhibit/theater combination will run through Jan. 8.

Bones: An Exhibit Inside You is an interactive traveling exhibit that invites visitors to slip out of their skins and discover their bones. Visitors enter through a covered bridge where lenticular photos expose the skeletons of people and animals. Skeletons at work or play teach about nutrition, bone strength and much more in a home, medical center and zoo.

Complementary to the Bones exhibit is Sci-Quest's newest Immersive Theater presentation, Inside The Human Body. Using the "Visible Human Project" developed by the National Library of Medicine and the University of Colorado, audience members will explore the intricate tapestry of the human anatomy from the cellular level and beyond.

Bones: An Exhibit Inside You is included with the purchase of a Sci-Quest general admission ticket. A Super Science Pass, which includes general admission and an Immersive Theater presentation, is \$11.75 for adults, \$11.25 for senior citizens, and \$10.75 for children.

Sci-Quest Hands-On Science Center is located on Wynn Drive within the Calhoun Community College-Huntsville campus.
